

Honored Guest,

On behalf of the entire staff, "Yokoso Japan," and welcome to Misawa Inn! It is our privilege to serve you and ensure your stay is a pleasant and comfortable one. Our knowledgeable staff is available for you 24 hours a day to answer any questions you may have. From your room, you can dial "0" to reach the front desk at any time.

To make the most of your stay at Misawa, please take the time to review this guest directory. It is filled with helpful information about our installation, local community and 35th Force Support Squadron facilities. Advertised programs on base are subject to change without notice, so we advise you to call the facility for the most current information. A listing of 35th Force Support Squadron facility phone numbers can be found in this directory and in the *Leisure Times* magazine. Additional information can be found online at https://35fss.com/.

We continually strive to be the best by providing quality service that exceeds your expectations. If you have comments or suggestions on how we can improve, feel free to contact me directly at 222-0280. Guest comment cards are provided in your room and at the front desk. Your comments and suggestions are always welcome and help recognize outstanding service and improve our operation.

We hope you enjoy your stay with us and your experience in Misawa. Again, Yokoso Japan.

Sincerely,

Misawa Inn Manager

WELCOME VALUED GUEST!

We have provided you with a few complimentary items

to get you through your first night's stay.

Feel free to ask any Lodging team member if you need any of these items replenished.

If you forgot to pack any other toiletry item, please come see us at the front desk.

We should have what you need available for purchase.

THE AIR FORCE INNS PROMISE

"Our goal is to provide you a clean, comfortable room
to guarantee a good night's rest and pleasant stay.

If any part of your stay with us is not satisfactory, please provide
the lodging manager or front desk staff an opportunity to 'make it right'."

HOUSEKEEPING SERVICES

Our housekeeping staff takes pride in providing guests with friendly, prompt and professional service. Hours are 8 a.m. - 4 p.m. daily. Placing clothes and personal items in closets and dressers will help us maintain your room to the highest standard as housekeepers are not allowed to move personal items. If you work nights and sleep during the day, please inform the front desk so that suitable housekeeping arrangements can be made. Service is provided daily unless a "Do Not Disturb" sign is displayed.* Please note that in accordance with health and safety standards, ALL** rooms must be serviced after 72 hours.

*/** In pet-friendly TLFs, housekeepers must be able to safely enter the room <u>daily</u> to clean, therefore pets must be secured in containers during that time.

DAILY SERVICE: Bed will be made, floors/carpets cleaned, toilet, sink, mirror, tub/shower cleaned, towels replaced (one for one, only if they are placed on the floor or in the bathtub/shower), wastebaskets cleaned and emptied and coffee/tea amenities restocked.

WEEKLY SERVICE: Includes all daily services with the addition of light dusting and furniture polishing, sheets changed, shower curtain cleaned, and floors vacuumed/mopped.

FIRE SAFETY AND EVACUATION

All Misawa Inn facilities are built in accordance with the highest safety standards and the staff takes diligent steps to ensure your wellbeing. All of the facilities are equipped with an early warning smoke detection fire alarm system, and most have a wet sprinkler system.

In the unlikely event a fire does occur we want each of our guests to be as prepared as possible. By educating yourself now you can increase your chances of a calm reaction in an emergency situation. Reviewing the following information can make a difference.

Upon arrival

- In Bldg 118: Locate the exit stairway adjacent to the balcony through the master bedroom. Also locate the two stairway fire exits on your floor. When you need to get out of your room, you should know exactly where the exits are. This will save precious time.
- In Bldgs. 662, 669 and 670: Locate the stairway fire exits on your floor. Walk to the exits to fix their location in your mind. Count the doors along the wall between your room and the exits.

If you see fire or smoke

- Locate the fire alarm pull stations in the hallway and fire extinguishers in your room (in rooms with kitchens).
- Call 911 or sound the nearest fire alarm, then leave the area immediately.
- Only the smallest fires are worth the attempt to extinguish. If there is an extinguisher nearby, use it only if the fire is small.
- Flee larger fires.
- Leave with your room key.
- Close doors against the fire as you leave.

• When the fire alarm sounds

- Take your room key with you.
- Place your hand on the door to feel for heat to test before opening.
- If the door is cool, open slowly. Immediately look for smoke.
- If there is little or no smoke, leave your room and go to the nearest exit. Stay near the wall, counting the number of doors to the exit, and feel along the wall as you go. If there is smoke, stay low to the ground.
- If there is heavy smoke, close your door quickly and remain inside your room.
- Never use elevators in emergency situations.

When you cannot leave your room

- Turn off the heat or fans to prevent smoke from being sucked in.
- Soak towels, sheets or blankets and stuff them in the crack under the door.
- Fill the bathtub with water and remoisten the towels and sheets as needed.
- Dial 911. If possible, telephone the front desk to report your location.

Evacuation

- If you are required to evacuate the hotel, you will be notified through the phone system, sound of the general alarm or by lodging staff.
- Proceed to the nearest exit.
- <u>Do not use the elevator</u> use the stairs only.
- The evacuation point for Bldg 118 is the parking lot of Tower 117. Bldg 670 and 669 is the central sidewalk area between Bldgs 662 and 664. The evacuation point for Bldg 662 is the sidewalk area in front of Bldg 670, near the playground.

Fire prevention

- All Misawa Inn buildings are non-smoking/vaping, tobacco free. Do not use tobacco products or smoke inside the buildings, common areas or balconies.
- Do not store highly flammable liquids (gasoline, charcoal lighter, flammable paint, etc.) in your room.
- Do not use unauthorized cooking or heating devices in your room (includes unattended crock pots).
- Do not place charcoal grills within 15 feet of the building.
- Do not leave cooking equipment unattended when in use.
- Do not place hot appliances such as irons, coffee pots, etc. in lockers, drawers or on top of the stove.
- Do not overload electrical circuits.

We appreciate your cooperation in keeping the guests and Misawa Inn safe and secure.

EARTHQUAKE SAFETY

If shaking begins

- Turn off the oven, stove or heat producing appliances.
- Drop down; take cover under a desk or table and hold on.
- Stay indoors until the shaking stops and you're sure it's safe to exit.
- Do not use the elevator.
- Stay away from televisions or furniture that can fall on you.
- Stay away from windows. Fire alarms and sprinklers may go off during a quake.
- If you are in bed, hold on and stay there, protecting your head with a pillow.
- If you are outdoors, find a clear spot away from buildings, trees, and power lines. Drop to the ground.
- If you are in a car, slow down and drive to a clear place away from power lines and buildings.

SHELTER-IN-PLACE (SIP)

Misawa AB is vulnerable to the health and safety impacts of a hazardous materials release. Misawa emergencies could be caused by the following:

- 1. Sumitomo Chemical Plant northeast of base adjacent to Cummings Elementary School and north housing Area
- 2. Release of Toxic Industrial Chemicals
- 3. Major Accidents or Aircraft mishaps
- 4. Terrorists use of Chemical, Biological, Radiological or Toxic Industrial Materials

When these events occur, there are two basic tools to protect personnel: Evacuation and Shelter-in-Place.

Evacuation is used when it is still safe to remove personnel from the hazard area. However, evacuations can take a very long time to complete and can actually expose some people to more danger than if they had just sheltered in place. For chemical releases of limited duration, it is faster and usually safer to shelter-in-place than to evacuate. Once notified of evacuation move quickly and following the direction of the emergency responders.

Shelter-in-Place (SIP) consists of taking refuge in an innermost room with little or no windows until the hazard passes. This option is chosen when evacuation is not a safe option for personnel and the hazard is quickly approaching. Once notified of SIP move quickly, follow the directions of your Unit Control Center, Commanders Access channel, or emergency responders. Please be aware of the location of all SIP rooms. Follow instructions in this directory and in SIP kits, located in each alternate SIP room. One thing to keep in mind is shelter-in-place is for short term (2-4 hours) protection.

Misawa Inn SIP Rooms are located in the bathrooms of each guest room. Secondary locations are on the first floor of each building as follows:

| Bldg 670 | 2 rooms: Training Room (two doors from the Admin office) and |
|----------|--|
| _ | the Conference Room at the west end of the hallway |
| Bldg 669 | 1 room: Employee Break Room near the east end of the hallway |
| Bldg 662 | 1 room: Fitness Room near the center of the hallway |
| Bldg 118 | Housekeeping rooms on each floor |

HISTORY OF THE MISAWA AIR BASE AND THE 35th FIGHTER WING

Based on archeological evidence, it is believed that Misawa City was populated by ancestors of the Ainu tribe, now found on the island of Hokkaido. Around 1100 AD, the Nambu clan took over the area with the establishment of nine horse farms in 1371. These farms supported the area until the Meiji Restoration. The successful cultivation of land and continued growth of horse farms drew increased attention from the Japanese military forces. Emperor Meiji established a national horse farm in the area, which eventually became one of the Japanese Imperial Army's cavalry training centers. At the onset of hostilities with China in the early 1930s, the cavalry transferred to mainland China and the Imperial Japanese Naval Forces took over Misawa.

The Japanese Navy began building an air base at Misawa in 1939 and completed it in 1942. The base was originally intended to be a long-range bomber base, but it was used instead for aeronautical training, research, and development. Lake Ogawara was an ideal location to train seaplane pilots, and a Kamikaze Corps trained here to infiltrate American bases and conduct sabotage attacks. In July and August of 1945, carrier-based American F4Us attacked and destroyed more than 90 percent of Misawa Air Base.

In September 1945, the first U.S. forces arrived at Misawa, beginning with the 32d Army Engineering Construction Group. In 1972, the U.S. Air Force Security Services' 6920th Air Base Squadron assumed host responsibilities for the base until 1978, when the base returned to the Pacific Air Forces under control of the 6112th Air Base Wing. On 1 July 1984, the 432nd Tactical Fighter Wing assumed duties as the host unit for Misawa Air Base. Initially the 432nd Wing flew F-16 A/B aircraft and converted to the more sophisticated F-16 C/D in November of 1986. On 1 October 1994, the 432nd Fighter Wing was officially inactivated and the 35th Fighter Wing activated at Misawa.

Established as the 35th Pursuit Group on 22 December 1939, the 35th Fighter Wing has a long and distinguished combat history. In December 1941, the 35th Pursuit Group had begun deployment to the South Pacific for World War II when Japan attacked Pearl Harbor. After a delay, the remainder of the 35th deployed to Australia to begin the gradual advance towards Japan. In combat against the Japanese, the group operated P-38s, P-40s, and P-47s. By the end of WWII, the group's pilots had destroyed 407 enemy aircraft in the air. Twenty one aces emerged from their ranks, including such notable airmen as Richard Bong, who scored his first aerial victories with the 35th, and Thomas Lynch, the group's leading ace of the war with 20 victories.

Following the Japanese surrender, the 35th Fighter Wing was stationed at numerous airfields in Japan, which positioned it for involvement in the next major conflict. On 25 June 1950 North Korea invaded the South. Two days later one of the wing's F-82s was involved in the first aerial engagement of the conflict, scoring one kill. Soon after the wing converted back to F-51s and began flying close air support and interdiction missions. The 35th played an important role during the Chinese intervention of the war, providing close air support for units along the Chosin Reservoir until forced to withdraw from Yonpo Airfield, North Korea. After the armistice the 35th returned to Japan and added reconnaissance to its mission, continuing to protect American interests in the region with RC-45, F-51, RF-51, F-80, F-86 and F-94 aircraft until its inactivation in 1957.

The wing once again entered combat when it returned to service on 1 April 1966 at Da Nang Air Base, Republic of Vietnam, as the 35th Tactical Fighter Wing. There the wing had five assigned flying squadrons and operated F-4C, F-102 and B-57 aircraft. The wing's F-4C pilots shot down four enemy aircraft during this time, including the first MiG-21 of the war.

On 8 October 1966, the wing moved to Phan Rang Air Base. While at Phan Rang, units assigned to the wing flew F-100, B-57, A-37B and MK-20 aircraft on aerial interdiction missions.

On 31 July 1971, the wing inactivated, ending its involvement in Vietnam. However, the wing did not remain inactive long. On 1 October 1971, the 35th Tactical Fighter Wing activated at George Air Force Base, California, where it assumed the mission of training F-4 flight crews and adding F-105s to the inventory in 1973. Shortly thereafter the wing began training crews for "Wild Weasel" missions (the detection and suppression of surface-to-air missiles) for deployment to operational units.

In August 1990, the 35th Tactical Fighter Wing deployed as the lead F-4G and RF-4C wing to Shaikh Isa Air Base, Bahrain, in support of Operation DESERT SHIELD. During the subsequent Gulf War, the 35th Tactical Fighter Wing flew 3,072 combat missions and launched 905 missiles at Iraqi air defense sites. Of the 38 allied aircraft lost during the conflict, only nine were downed by radar-guided surface-to-air missiles. Of those nine, eight did not have Wild Weasel protection. By suppressing the enemy's air defenses, the wing significantly contributed to the air campaign's success by making the skies safer for coalition airmen.

On 1 October 1991, as part of a service-wide reorganization, the Air Force re-designated the 35th Tactical Fighter Wing as the 35th Fighter Wing. In 1992, the wing started downsizing in preparation for the closure of George Air Force Base, and on 15 December 1992, the 35th Fighter Wing inactivated and George Air Force Base closed.

In the early 1993, the 35th Fighter Wing began a new chapter in its history and cemented its permanent association with the Wild Weasel mission. In an effort to preserve its heritage, the Air Force initiated a heritage score system that identified the 35th Fighter Wing as the third most historic wing in the Air Force. As a result, the 35th reactivated at NAS Keflavik from May 1993 to September 1994 where it an air defense mission flying F-15C *Eagles*. On 1 October 1994, the 35th Fighter Wing relocated to Misawa Air Base, and the 35th Operations Group assumed command of PACAF's Wild Weasel squadrons, the 13th and 14th Fighter Squadrons. In 1996, the 13th and 14th Fighter Squadrons achieved operational capability with the F-16CJ, the Air Force's most recent dedicated Wild Weasel platform.

Since beginning operations at Misawa Air Base, airpower and combat capability have remained at the forefront of the wing's focus and pride. During Operations NORTHERN WATCH and SOUTHERN WATCH, the fighter squadrons of the 35th Fighter Wing deployed twelve times culminating in the participation of the 14th Fighter Squadron in the opening combat missions of Operation IRAQI FREEDOM in March 2003. Since then, the squadrons and personnel of the 35th Fighter Wing have deployed around the world, reaffirming the 35th Fighter Wing's proud warrior tradition.

Stationed in Japan on the Pacific's "Ring of Fire," Misawa Air Base is prone to large, periodic earthquakes. On 11 March 2011, a magnitude 9.0 undersea earthquake, the most powerful known earthquake to ever strike Japan, generated a devastating tsunami that slammed the eastern coast of northern Japan. The 35th Fighter Wing responded to the crisis providing disaster relief to the region. Search and rescue teams and humanitarian supplies flowed though Misawa Air Base to the citizens of Japan as the men and women of the 35th Fighter Wing donated their time to assist in the recovery efforts. Dubbed Operation TOMODACHI for the Japanese word for friend, US Air Force, Navy, Marine, and Army forces in Japan responded to the crisis with urgency and compassion in an effort to assist our Pacific allies.

Today, the men and women of Misawa Air Base and the 35th Fighter Wing stand ready to protect US interests abroad. We are proud of our home and history, and we welcome you to Misawa Air Base.
